Opening a New Shopping Mall in Kuala Lumpur, Malaysia

Business Problem

- Location of the shopping mall is one of the most important decisions that will determine whether the mall will be a success or a failure
- Objective: To analyse and select the best locations in the city of Kuala Lumpur, Malaysia to open a new shopping mall
- This project is timely as the city is currently suffering from oversupply of shopping malls
- Business question

□ In the city of Kuala Lumpur, Malaysia, if a property developer is looking to open a new shopping mall, where would you recommend that they open it?

Data

- Data required
 - List of neighbourhoods in Kuala Lumpur
 - Latitude and longitude coordinates of the neighbourhoods
 - Venue data, particularly data related to shopping malls
- Sources of data
 - Wikipedia page for neighbourhoods

(https://en.wikipedia.org/wiki/Category:Suburbs_in_Kuala_Lumpur)

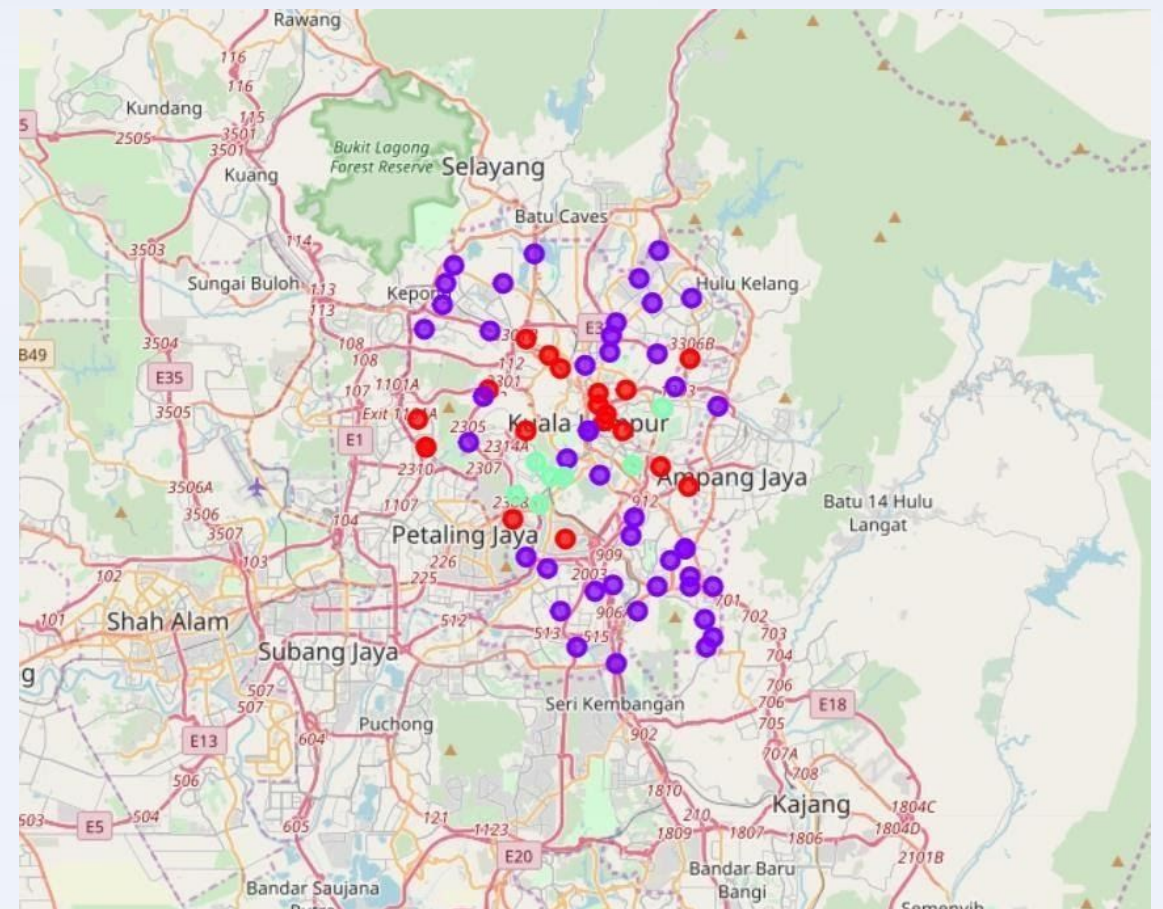

- Geocoder package for latitude and longitude coordinates
- Foursquare API for venue data

Methodology

- Web scraping Wikipedia page for neighbourhoods list
- Get latitude and longitude coordinates using Geocoder
- Use Foursquare API to get venue data
- Group data by neighbourhood and taking the mean of the frequency of occurrence of each venue category
- Filter venue category by Shopping Mall
- Perform clustering on the data by using k-means clustering

- Visualize the clusters in a map using Folium

Results

- Categorized the neighbourhoods into 3 clusters :
 - Cluster 0: Neighbourhoods with moderate number of shopping malls
 - Cluster 1: Neighbourhoods with low number to no

existence of shopping malls

- Cluster 2: Neighbourhoods with high concentration of shopping malls

Discussion

- Most of the shopping malls are concentrated in the central area of the city
- Highest number in cluster 2 and moderate number in cluster 0
- Cluster 1 has very low number to no shopping mall in the neighbourhoods
- Oversupply of shopping malls mostly happened in the central area of the city, with the suburb area still have very few shopping malls

Recommendations

- Open new shopping malls in neighbourhoods in cluster 1 with little to no competition
- Can also open in neighbourhoods in cluster 0 with moderate competition if have unique selling propositions to stand out from the competition
- Avoid neighbourhoods in cluster 2, already high concentration of shopping malls and intense competition

Conclusion

- Answer to business question: The neighbourhoods in cluster 1 are the most preferred locations to open a new shopping mall
- Findings of this project will help the relevant stakeholders to capitalize on the opportunities on high potential locations while avoiding overcrowded areas in their decisions to open a new shopping mall

Thank you!
